

# ArchViz Sofa Pack

Hey, thanks for download ArchViz Sofa Pack. Before start, you need to know a few things:

- All models are highly customizable. You can move, duplicate, delete and change colors and material type of every pillow if you want.
- All the textures are white by default, so is easy coloring them just giving a tint in the material editor
- In materials folder of each there is a blank material. I made this to simplify your life when creating new variations. In **"Main Maps"** you can add textures that represents the cloth of the sofa (textures of the pack or your own textures) and in **"Secondary Maps"** has a normal map baked to give details for each sofa.

I think that is all you need to know. If you have any doubts please send me an email.
